

# Teen Drivers and Adaptive Vehicle Technology

**John D. Lee**

**Department of Mechanical and Industrial Engineering  
Center for Computer-Aided Design**

# Increasingly distracting technology

# Technology trends

---

- **85%** of those who have phone use it while driving
- **60%** of total cellphone usage is while driving
- **8%** of drivers on the road are talking on the phone
- **20-80%** of crashes situations involve distraction
- **Crash costs: \$15 billion, 1,500 lives per year in US**

- **\$10-100 Billion market for telematics devices by 2010**

# Increasingly powerful driver support systems

---

[www.forbes.com](http://www.forbes.com)

Courtesy Volvo

**Brake lamps, forward collision warnings,  
brake assist**

[www.forbes.com](http://www.forbes.com)

**Lane markings, road departure warnings,  
steering assist**

## Adaptive Interface for Workload Management

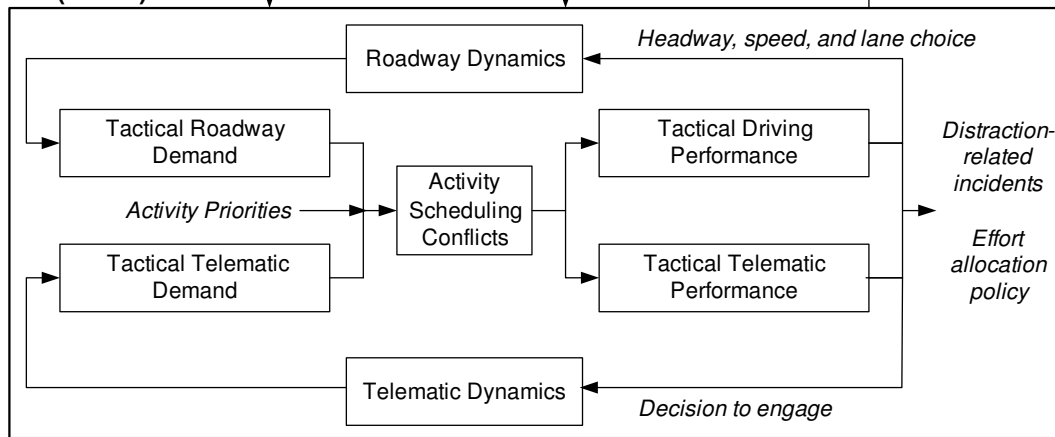

# Potential mitigation strategies

LEVEL OF AUTOMATION	DRIVING RELATED STRATEGIES		NON-DRIVING RELATED STRATEGIES	
	System Initiated	Driver Initiated	System Initiated	Driver Initiated
High	<i>Intervening</i>	<i>Delegating</i>	<i>Locking &amp; Interrupting</i>	<i>Controls Pre-setting</i>
Moderate	<i>Warning</i>	<i>Warning Tailoring</i>	<i>Prioritizing &amp; Filtering</i>	<i>Place-keeping</i>
Low	<i>Informing</i>	<i>Perception Augmenting</i>	<i>Advising</i>	<i>Demand Minimizing</i>

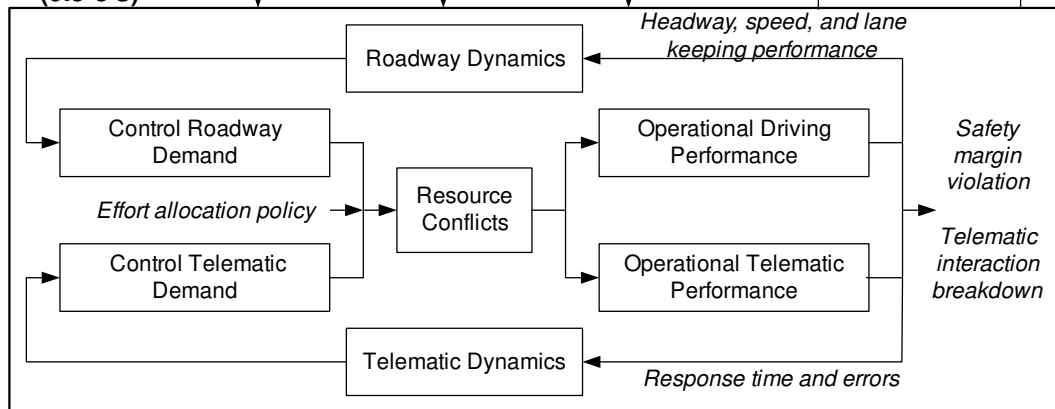

**Strategic behavior  
(minutes-days)**

**Tactical behavior  
(5-60 s)**

**Operational behavior  
(0.5-5 s)**

**Strategic**

- **Social norms**

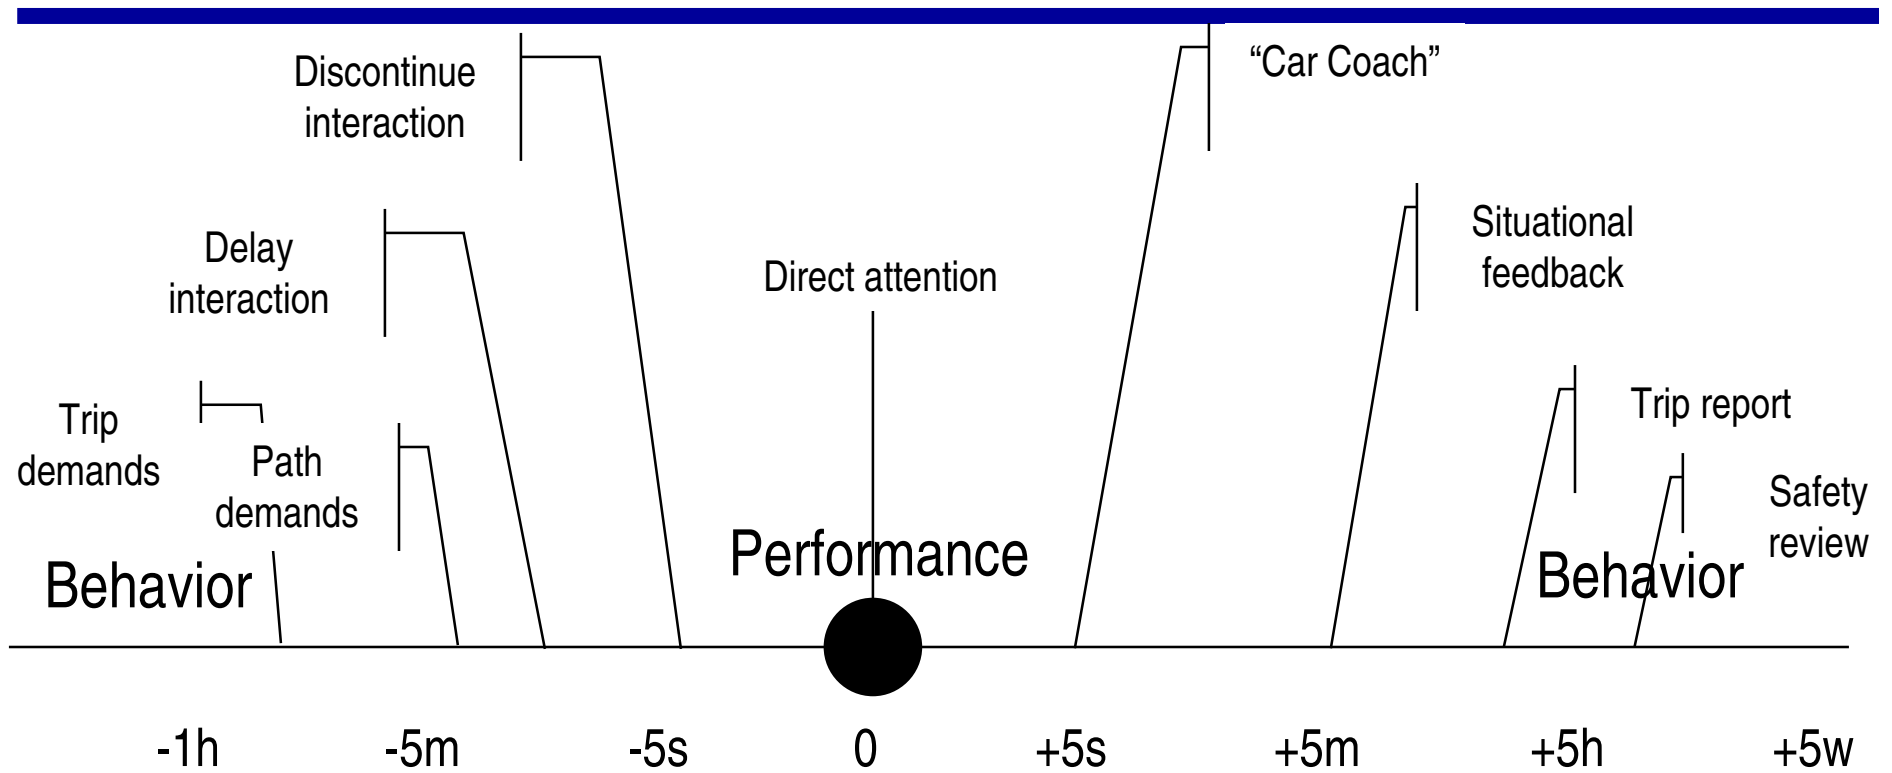

**Tactical**

- **Task interruption and scheduling**

**Operational**

- **Task conflict**
